COLLEGE OF PHARMACY, PALUS**

Activity Report: Field Visit to Medicinal Garden

Date: 02/01/2026

Venue: Shri Vishwaraj Ayurvedic Chikitsalaya & Research Centre, Palus

Bharati Vidyapeeth College of Pharmacy, Palus organized an industry field visit for D. Pharm. students to the Herbal Garden at Shri Vishwaraj Ayurvedic Chikitsalaya & Research Centre, Palus dated on 02/01/2026. The coordination for this visit was efficiently handled by Hirkani Pawar.

Giving students hands-on experience with the cultivation and production methods of herbal medicines was the aim of this field trip. Through this excursion, students were able to learn more about the traditional Ayurvedic techniques and the importance of herbal treatments in medicine. Upon arrival, students were greeted with a warm welcome and an introductory session about the Herbal Garden and its significance in Ayurvedic medicine. They were then guided through the garden, where they had the chance to observe and learn about various medicinal plants and herbs used in Ayurvedic formulations.

Throughout the visit, students engaged in interactive sessions with resource person Dr. Ajit B. Patil of Shri Vishwaraj Ayurvedic Chikitsalaya & Research Centre. They received explanations about the cultivation, harvesting, and processing of medicinal herbs, as well as their therapeutic properties and applications in traditional medicine.

The field visit to the Herbal Garden provided D. Pharm. students with a holistic understanding of herbal medicine production and its role in healthcare. It was a valuable learning experience that complemented their academic studies and broadened their perspective on pharmaceutical sciences. It is expected that this industry field visit will inspire students to explore career opportunities in herbal medicine and integrate traditional knowledge with modern pharmaceutical practices.

The successful completion of this field visit was strongly supported by the continuous motivation and encouragement of our respected Principal. His guidance and support played a vital role in motivating students to actively participate in this educational activity, thereby enhancing their learning experience and overall academic development.
